

Doctrine Announcements: (15 MAY 2026)

1. TECOM G3 transitioned VCE MCTC website to SharePoint. SP website has 24 MCRPs that were “divested” from USMC Doctrine Library by DC CD&I. Website allows you to download/view publicly releasable MCTCs. *Engineer Field Data* is **LIMDIS** MCTC. To view this pub, request permission from TECOM G3 MCTC website manager, Mr. Horace Vinson. MCES S3 Doctrine homepage hyperlink connects to TECOM SP, allowing you to view/download publicly releasable MCTCs.

2. USMC Doctrine Library URL changed to: https://usmc.sharepoint-mil.us/sites/MCEN_MCDoctrine

As you first open the website, you’ll be asked to request access before you can view/download pubs. Recommend requesting full access if you need to view pubs containing critical unclassified information (CUI). After requesting access, you’ll receive email acknowledgement your access has been authorized. Marines assigned to commands that use another Service’s email domain (e.g., @army.mil, @navy.mil) must request access or use USMC email domain account (@usmc.mil).

3. Change 1 of MCWP 5-10, *Marine Corps Planning Process*, is in USMC Doctrine library. It corrects errors that were identified by MCES several years ago. See image below.

4. The Navy’s Expeditionary Warfare Development Center (EXWDC) is leading IPT revision of NTTP 3-10.1M/MCTP 3-34D, *Seabee Operations in the MAGTF*. Pub’s title changed to *Integrated Naval Formations – Expeditionary Engineering* to align with other naval expeditionary pubs, **Navy number changed to NTTP 4-04.1.1M. Navy author submitted signature draft to NWDC editors. Pub will be routed for signature afterward.**

5. Based on the results of 2024 Front-End Analysis, EXWDC is developing a Navy-only TACMEMO, TM 4-04.2.1-26, *Engineer Reconnaissance and Assessment*. **MCES is advising/assisting IPT lead during revision of first draft to reflect IPT member feedback.**
6. Errors in Table E-2 of ATP 4-44/MCRP 3-40D.14 were discovered by a keen-eyed CWO2. **MCES and Army Proponent submitted a change to the pub (to remove the current table and replace it with a correct one). This table provides chlorination dosing values in imperial units of measure for various quantities of bulk water and chlorination chemicals.**
7. **Change 1 to MCWP 3-34 is available on the USMC Doctrine Library website.** Change involved removal of DA forms for water support and substitution of DD forms (in appendix D), inserting two new DD forms for environmental matters (in appendix D), and updating information about several multi-Service engineering pubs (USAF, USN, JPs).
8. Army's Maneuver Support Center of Excellence (MSCoE) has developed final draft edition of an Army-only pub, *Engineer Platoon*. Pub consolidates information from TM 3-34.85/MCRP 3-34.1, *Engineer Field Data*, in appendices. When this pub is approved, *Engineer Field Data* will be cancelled. MCES was notified of Army's plan and issued a request for feedback (RFF) questionnaire across the Service. Feedback received will be used to determine which information should be retained, revised, eliminated, or added as the pub is modified to be a Marine Corps-only pub.
9. **Joint Construction Management System (JCMS) version 5.0.3.1 has been loaded to the MCEN Software Center.** Installation instructions for version 5.0.3.1 will need to be followed to successfully download and install *JCMS Launcher* and the *Design and Construction* application. This version includes new designs such as displaced persons camp, temporary wood/CMU/PEB structures (armory, chapel, dining facility, post office, admin office, ops office), detention center, roads, runways (concrete, asphalt, earthen, AM2), and metric CMU designs for EUCOM and INDOPACOM AORs). The JCMS program office is working to field version 5.1 during **3rd-4th quarter of FY26**. Version 5.1 will allow users to modify drawings without having to import the drawings into AutoCAD software. **During the week of 11-15 May, an MCES instructor attended training at ERDC on version 5.1.**
10. **US Army Corps of Engineers Reachback Operations Center (UROC) uploaded the 2024 edition of the International Plumbing Code (IPC) into the Reference Library. It can be found by searching Handbooks and Manuals, then the IBC folder via the REDi Portal.**
11. The US Army Engineer School and MCES have been revising TM 3-34.82/MCRP 3-34.2, *Explosives and Demolitions*. **MCES awaits corrected draft from the Army before pub is distributed for WWS as a coordinating draft.**
12. NWP 3-15, *Naval Mine Warfare – Volume II*. **New edition is in Navy Warfare library SIPR.**
13. MCES is collaborating with MAWTS-1 during revision of MCTP 3-20B, *Aviation Ground Support*. MCES provided feedback about the coordinating draft edition via CRM. MCES is monitoring the Air Force's revision of AFTTP 3-32.17, *Rapid Airfield Crater and Spall Repair*.
14. In SEP 2025, CASCOM announced development of a new Army Techniques Pub, ATP 4-45, to address TTP for showers, laundry, and FORCE PROVIDER contingency base equipment support. MCES negotiated multi-Service partnership via TECOM and CADD. **Pub is assigned USMC designation as MCRP 3-40D.18. Pub development has begun. Tentative title is *Shower, Laundry, and Contingency Base Equipment Operations*.**

15. JP 4-03, *Joint Bulk Petroleum and Water Doctrine*, is under revision. USTRANSCOM is the Lead Agent (author). HQDA DCS G4 is responsible for water content in pub. **HQDA DCS G-4 agreed to form multi-Service writing team to revise water content.** MCES will participate in IPT. **Await IPT kick off mtg.**

16. **MCES is working with USAES and USACE to revisit the information contained in the three volume SWEAT-IR handbooks that are in the Reference library of the UROC-REDi portal. These books were written by USACE in 2007 based on a request from USAES CMTD. USAES CMTD funded pub development because the books are used in the engineer reconnaissance curriculum. The books provide a description and photos of typical civilian infrastructure, along with forms combat engineers can use to record reconnaissance data. The forms are aligned with UFC 1-201-02, *Assessment of Existing Facilities for use in Military Operations*, but do not have a departmental designation (e.g., Department of Army, Department of Defense). The forms are included in the Army's Infrastructure Reconnaissance Information System (IRIS), which works with Survey123 mobile phone application to populate databases in the Joint Engineer Common Operations Picture (JECOP). The forms are also available on the ENFIRE system's laptop.**
